

Don't Buy These Components

Have you bought a component that was poor quality, broken or ineffective? Let us know and we can post it here so this doesn't happen to anyone else.

Top tip -- go to the [ORB catalogue](#) and search for components, if you click the link you can see what we buy.

Servos

- We have had problems with: [XTVTX metal gear micro servo](#) -> some didn't work straight out of the box, with others the wires broke off, poorly made
- good: (the ones we buy) [FeeTech FS90 Mini Servo](#)
