

01/11/23: Blender for Beginners

Technician: Lieven

Blender is a super awesome, free and open source software for 3D modelling, sculpting, rendering, animation and more! Whether it is for creating game assets, installation sketches, motion / infographics, 3D scans, robotics, virtual production, fabrication or just having fun. This workshop uses the free Blender software: on the CCI MacBooks you can use 'UAL Self Service' to install it, or 'Zenworks' on the CCI Windows PC's. A three-button mouse is definitely recommended, but not strictly required.
